POWERWARE UNINTERRUPTIBLE POWER SUPPLY

240VAC MAINS UPS POWER BACKUP SOLUTIONS

Protect valuable equipment investments in the office and home against power outages economically. Any electronic appliance can gain advantages from being protected.

Power protection involves not only backup voltage supplied from a battery when power outages occur, but also stopping spikes, noise and fluctuations of the mains supply. Some UPS will even regulate the mains (See ABM).

Power protection is essential to business as it prevents problems including data loss, file corruption, hardware damage, inadvertent equipment shutdown. Being prepared saves you money when equipment unexpectedly stops working. Equipment service life can be greatly extended when protected and many unexplainable problems can be attributed to this invisible source voltage.

Powerware have a comprehensive range of professional voltage backup systems.
www.wescomponents.com/powerware or www.powerware.com.au

THE CHOICE IS EASY

Powerware 3105 Basic Backup with Modified Sine Wave. Compact. Prevent power surges and sags from affecting your PC and peripheral equipment with enough battery backup for your PC to ride through most power outages. Excellent for single workstations, POS, Lighting, etc.

Powerware 5110 Basic Backup Modified Sine Wave with the AVR* advantage. The next step up in voltage protection with AVR* to smooth out voltages, regulate power fluctuations & protect PCs, workstations, servers, etc. Line-Interactive, Automatic-Voltage-Regulation* for a consistent 240Vac.

Powerware 5115 Pure/True Sine Wave Output during backup plus AVR*. For more critical applications a cleaner backup voltage is required. This series is True Sine Wave output where crucial, yet cost effective protection is essential. Ideal for small servers and sensitive equipment.

Powerware 5115RU Premium confidence solution for professional installations The Pure Sine Wave Output of the 5115 above, in a space saving rack unit.

POWERWARE POWERBOARD UPS

3105 Series Modified Sine Wave Power Board with Filtering.

Plug your valued equipment into this ultimate six way power board. Ideal compact, affordable UPS system for your small office or home office. Ready to switch to UPS battery power any time it detects a power problem. With surge suppression and line filtering for mains, telephone & LAN.

Backup power for cordless phones, computers, cash registers, lights, etc. Saves space with a compact design that fits easily under a desk, etc. Also has separate surge protection circuits for LAN or telephone lines. Informs you of power problems and low battery conditions with audible alarms and remote alarm notification via software through a USB port.

LanSafe V.5 Software included for network monitoring, auto-shut-down, etc.

POWERWARE LINE INTERACTIVE UPS with AVR*

5110 Series Modified Sine Wave Battery backup & filter UPS with AVR*

This line-interactive UPS system delivers excellence in power quality by constantly monitoring and adjusting the mains voltage with AVR*.

Safeguarding your equipment from power surges, sags, brown-outs, black-outs, under-voltage & over-voltage conditions by supplying an unvarying 240Vac. Saves space with a compact design that can be a free-standing tower or horizontally under a computer monitor, etc. Attractive black design. Extends UPS service life with user-replaceable SLA batteries available. Provides UPS operating status via USB with Powerware LanSafe Software.

POWERWARE PROTECTS YOU FROM THE MOST COMMON POWER PROBLEMS

There are five common types of power problems, shown in the table below. This concept clarifies what types of problems can be avoided with which solutions, and in which environment each solution is the most useful. The Powerware 3000 Series products protect you from problems 1 to 3, The Powerware 5000 Series protects you from all 5.

- 1 Power Failure
- 2 Power Sag
- 3 Power Surge
- 4 Under Voltage

IEC POWER LEADS

The 5000 Series units all use IEC Power connections In/Out. See following pages for IEC Leads

ADVANCED BATTERY MANAGEMENT (ABM**)

The lead-acid batteries typically used in a UPS are judged to be viable as long as they can maintain backup times of at least half that of a new battery. Virtually all other UPSs on the market today have batteries that are constantly trickle charged. Those batteries reach the end of their useful life in less than half the time of batteries that are charged using ABM. ABM uses a three-stage charging technique that doubles battery service life and also quickens battery recharge time and provides up to a 60-day advanced notification of the end of useful battery life.

ADVANCED VOLTAGE REGULATION (AVR*)

A unique transformer switching solution that changes the output voltage, depending on the input voltage, so that 240Vac is always maintained removing any fluctuations in supply voltages to your equipment.

POWERWARE LINE INTERACTIVE UPS SINE WAVE

5115 Series Pure Sine Wave Output Battery Backup with AVR*.

True sine wave output during battery backup gives the best power supply integrity for maximum electronic appliance protection. Ideal for sensitive equipment, minimising any chance of interruption to critical electronics like computers, main frame servers, any enterprise or office equipment. Some electronic appliances will not function unless supplied true sine wave. Hot swappable batteries, so no equipment down time if servicing required. Enhanced rapid battery charge time for next incident preparation. ABM** will give you advanced warning of the end of useful battery life. AVR* regulates power fluctuations with Buck and Boost voltage regulation. Ensure data integrity with free Software Suite bundle including LanSafe V.5

POWERWARE LINE INTERACTIVE UPS SINE WAVE 1RU RACK MOUNT

5115-RM Series Same as 5115, in a space saving super-flat 1U rack unit. The Powerware 5115 Rackmount UPS is a high-density power quality and backup power protection solution ideal for servers, storage systems, network equipment and any other critical devices and enterprise equipment. The slim design and wide range of UPS system installation possibilities make the 5115-RU UPS a very versatile UPS power quality solution. Conserves valuable space with 1U rack height. Premium build quality. Delivers smooth, continuous power with pure sine wave output during backup. Protects from power fluctuations with AVR* Buck & Boost voltage regulation. Includes removable mounting hardware for efficient 1U rack mounting, Side cabinet and Wall mounting kit (0U) or flat bench-top installations.

HDMI V1.4 SPLITTER WITH ETHERNET INJECT & CEC FUNCTIONS**HDMI ETHERNET CHANNEL (HEC) - 3D - CONSUMER ELECTRONICS CONTROL (CEC) - AUDIO RETURN CHANNEL (ARC)**

This is a high performance one input & eight outputs HDMI splitter that supports 3D and individual CEC control functions. One out of the eight outputs port supports Audio Return Channel (ARC) and HDMI Ethernet Channel (HEC) follow by HDMI v1.4 Specification. The ARC provides an S/PDIF link from an HDMI™ sink and output through ARC port to AVR to get true audio from the sink. The HEC feature adds a connection to the HDMI link that is capable of carrying the same data as a full duplex, 100Mbps Ethernet connection. Using an HDMI with HEAC cable allowing for convenient integration of Digital Televisions (DTVs) into the end user's home network system.

- Support multiplexed HDMI 1-input and 8-output.
- Output port 4 supports Ethernet Channel (HEC) and Audio Return Channel (ARC) follow by HDMI v1.4 specification.
- HDMI 1.4 support.
- Audio Return Channel (ARC) 3D, CEC1.4
- HDMI Ethernet Channel (HEC), enabling high-speed networking.
- HDCP repeater support.
- Deep Colour support 36/30/24-bit, 1080p@60Hz.
- EDID can selected standard or TV EDID.
- Support System reset or CEC on switch.
- Audio support: HDMI 1.4 compatible audio interface.
- Dedicated, flexible audio input/output port.
- Dolby. True HD, DTS-HD Master Audio.
- Full audio input and output support.

ETHERNET MULTI-MEDIA KVM TX/RX

Multi-Media LAN Transmitter and Receiver allow HDMI and/or USB host device to send and save data while offering four USB ports for other tasks. Includes extra functions such as IR, line-out and a microphone for users to enjoy controlling devices from far away and for sending audio/sound from your favorite audio devices. Connect to another device from the same family you can extend the transmission distance as far as you want without any signal loss / delay or connect with multiple pairs of the extender to set up a Local Area Network of up to 16 units/devices for data sharing among the connected sources and displays. The HDMI & USB over a CAT5e/6 transmitter and receiver box are the ideal choice for your HDMI & USB extension, data sharing and multimedia sharing needs.

- Supports data sharing over LAN cable (TCP/IP).
- HDMI v1.3, HDCP v1.1 and DVI v1.0 compliant.
- Support USB 2.0 and USB 1.1 devices.
- Operate with USB host controllers.
- True plug and play without any driver installation.
- Display and control host device and source equipment.
- Save and share data into a separate room.
- CAT5 cable distance tested up to 100 metres, connect with other units from the same family to operate over long distances or link up to 16 devices for data sharing.
- Digital display output up to 1920 x 1080@60Hz.
- Adopt visually lossless video compression algorithm.
- Automatic display mode detection.
- DDC synchronization.
- Simple set up with easy to use.
- LED indicators for easy viewing.
- Total transmission frequency 1GHz.

HDMI / IR / RS232 / ETHERNET EXTENDER OVER CAT5e/6

HDMI & IP OVER A SINGLE CAT5e/6 CABLE

Extend HDMI, IR, RS232 and also your LAN (IP/ethernet network) over a single CAT5e/CAT6 cable. HDMI loop through on Transmitter for instant display at the control point. 3 In/Out LAN ports. IR Extender/ Repeater on each unit. This device allows you to extend your display to another area and also extends multimedia features.

- Household entertainment sharing and control.
- Lecture room or showroom display and control.
- HDMI 1.4 (with Audio Return Channel), HDCP & DVI Compliant.
- Supports HDCP repeater and CEC function.
- Simultaneously uncompressed data sending over a single 100M/328ft with CAT6 cable or 80M/262ft with CAT5e cable.
- Uncompressed video 1080p, 60Hz, 48bits, 3D and 4K x 2K.
- Audio support up to 7.1CH & Dolby True HD, DTS-HD.
- Ethernet speed up to 100Mbps.
- Various controls over HDMI CEC, RS232 & IR.
- 5Play™ convergence: HDMI & Control (IR & RS232)/LAN/PoE.
- Installation Friendly.

Note. HDMI does not use IP protocol over the Cat6 cable.

DVI SWITCHER

MULTIPLE INPUT - SINGLE OUTPUT - WITH REMOTE CONTROL

This DVI Switcher series are high performance components with remote. Place between your various DVI input sources and a DVI display monitor. Simply pressing a button on the front panel or directly on the remote you can select your desired DVI source for display on the DVI monitor output.

- HDCP 1.1 and DVI1.0 compliant.
- Signal enhancer to improve image quality compensates cable losses.
- LED source selected indicators.
- Supports high resolution input:
- PC: VGA, SVGA, XGA, SXGA, and UXGA (1600x1200)
- HDTV: 480i, 576i, 480p, 576p, 720p, 1080i and 1080p @60Hz.
- Remote control included.
- Easy to install and operate.

DVI TWIN CAT5 EXTENDER

DIGITAL COAX & ANALOGUE AUDIO 3.5mm

DVI transmitter and receiver over CAT5 is an extender for DVI signal - up to 100 or 250 metres long. Not only can this device transfer the HD image signal but also the analog/digital audio signal with coaxial and L/R audio 3.5mm. Through the DDC cable the device can also support HDCP and CEC. This extender is perfect for extending high resolution digital signage with crystal clear images over low cost network solution.

- Compliant with HDMI 1.2, HDCP 1.1 and DVI 1.0 specifications.
- Equalizer, Gain, CTI (Colour Transient Improvement) adjustment.
- Supports high definition up to 1080P/UXGA, output res follows input.
- Easy to install and simple to operate.
- Supports DDC/HDCP signal transferring through DDC cable.
- Build-in EDID at transmitter.
- Support both external Coaxial and Stereo Sound.

DVI SINGLE CAT6 EXTENDER

DVI-D VIDEO EXTENSION OVER CAT6 CABLE

DVI-D Transmitter and Receiver over One CAT6 extends your DVI-D devices over long distances easily. CAT-6 high bandwidth up to 2.25Gbps per channel. These devices are hardware based with fast and easy installation and are perfectly suited for common PC and notebook using.

- Supports digital video formats up to 36 bits.
- Support high definition input/output up to WUXGA/1080p.
- Uses one CAT6 cable for data/DDC transmission.
- Equalizes and recovers incoming TMDS data before re-transmitting it in optimal quality.
- DVI Cable testing showed that with WUXGA/1080p 8 bit resolution, input or output device can run up to 12 metres away and with WUXGA/1080p 12 bit resolution it can run up to 10 metres away.
- When transmitting a signal in WUXGA/1080p 8 bit resolution the CAT6 operating distance is 40 metres, and when the signal is in 12 bit resolution the CAT6 operating distance is 15 metres.
- Power over CAT6 available but It is recommended to use power adaptor on both transmitter and receiver side to get the best performance and long distance operating.
- Using power adaptor on transmitter side only, receiver side powered over CAT6 cable, the operating CAT6 cable distance will decrease to 20 metres or less.

COOLER FANS

DC type cooling fans are essential for many different types of cooling applications, but they do have a relatively short life expectancy when used on products that are designed to operate continuously in hot or hostile environments. One of their major limitations comes from the bearing system within the fan mechanism.

Generally, there are two options of bearings that they can consider. Either sleeve type bearings, with an average life expectancy of 30,000 Hr or a double ball bearing type with an average life expectancy of 50,000 Hr. In both cases these figures will drop if the fan is exposed to high ambient temperatures, corrosive or hostile environments. Noise levels on these metal type bearing fans can also be a downfall, as it will increase in loudness as operational time gets longer.

ceramica

NEW TECHNOLOGY FAN BEARINGS

It was, therefore, only a matter of time before better high tech materials were available to replace the common ball bearing. Ceramic materials have come a long way since their discovery last century and the development costs have fallen dramatically due to special low cost techniques.

New production developments have allowed Ceramica to develop a process of injection molding of ceramic sleeves using zirconia powder together with an adhesive to produce a very strong, flexible and durable ceramic sleeve that replaces the common metal bearing.

These new, low cost ceramic bearings are claimed to be far superior to the conventional ball bearing and economical sleeve bearing types of fans. So you can save money with confidence of a reliable product from WES.

BEARING TYPE

Sleeve
Metal Ball
Ceramic

LONGER LASTING AND QUIETER

Ceramic bearings run more smoothly and are quieter than their steel equivalents, and their life expectancy is increased by a factor of six!

While the average life span of a ball bearing fan is 50,000 Hr a ceramic equivalent model has a 300,000 h life expectancy, and at a lower cost!

Since 1975, considerable research, development and marketing efforts have been expended on zirconia or ceramic steel which offers the traditional ceramic benefits of hardness, wear resistance and corrosion resistance, without the characteristic ceramic property of absolute brittleness.

An ideal solution has been formulated with a product using Zirconia powder that can be injection molded for an economical manufacturing process.

THE CERAMIC ADVANTAGE

High strength High fracture toughness High hardness Wear resistance Good frictional behavior Non-magnetic Electrical insulation Low thermal conductivity Corrosion resistance to acids and alkalis Modulus of elasticity similar to steel Coefficient of thermal expansion similar to iron All these advantages are incorporated into the mold injection of the shaft and shaft sleeve of a fan to produce a strong sleeve.

Now there is a full range of DC fans using ceramic bearings. We also stock the popular alternatives for your consideration

BEARING TYPES

Each fan in stock is listed with its bearing type:

Cer. Ceramic	Ball Metal Ball Bearing	Slv. Sleeve CU-Sintered
High-Reliability	High-Reliability	Line contact sleeve
Low-Noise	Double Ball type	Low-Noise
Cost-Effective	Cost-Effective	Cost-Effective

Comparisons between Ceramica Fans and Conventional Fans

Feature Comparison	Conventional Fans SUS420 Steel Shaft		Ceramica Fans ZrO ₂ Ceramic Shaft
	Ball Bearing	Cu Sintered Sleeve	Cu-Fe Alloyed Sleeve
Contact Mode	Multi-Point Contact. Rolling Friction.	Line Contact. Sliding Friction.	Reduced Line Contact with Minimized Sliding Friction.
Noise Level	Steady noise level through life. Generally higher than sleeve bearing.	Lower noise level than ball bearing at early stage but gradually increases over life.	ZrO ₂ shaft is fine polished to a mirror-like surface and thus substantially reduce noise level to lower than both ball and sleeve bearings.
Machining Precision	The characteristics of SUS420 present inherent limitation in machining precision to reach finite dimensional and geometrical tolerance.		Near-net-shape formed shaft needs minimal machining to achieve high level of precision.
Hardness	HRC = 50		HRC = 90
Durability	Good for high-speed operation at normal condition, but sensitive to changes in humidity and temperature.	Prone to be worn out of shape due to lower hardness or lack of fitting precision.	Stable operation throughout life as a result of superior material property that provides resistance to wearing, deformation, oxidation and corrosion.
Precision of Movement	Good level of precision but very fragile under external impact.	Low level of precision. Easily cause clogging or seizing.	High level of precision due to: 1. Machining and fitting 2. Lower thermal expansion coefficient, 3. Secondary polish effect between shaft and sleeve
Life Expectation	2-Ball system: 50,000-65,000 hrs avg. 1-Ball-1-Sleeve: 50,000 hrs avg.	30,000 hrs avg.	300,000 hrs avg. (from MTBF test by CSIST)

USB3 SUPERSPEED**NEW 5Gbps Data Transfer Standard over four twisted pair cable**

The USB3 Plugs Type A and B have an additional 5 pins over the original 4. USB3 is backward compatible with USB1 & USB2 plugs and peripherals. USB3 Peripherals may plug into USB2.0 but with performance drop to 2.0. USB1.1 & USB2.0 peripherals will plug into USB3 and perform to USB2.0 USB offers the advantage of 5V 900mA power over cable compatibility.

USB3 PLUGS & SOCKETS

Maintains existing USB1.1 & USB2.0 standards + SuperSpeed
USB3 Plug Type A is backward compatible with USB1.1 & USB2.0 USB3 Plug Type B plug differs in build. It will accept the older USB. ie: USB1.1 & USB2.0 peripheral device will plug into a USB Type B receptacle but not vice-versa as the new USB3 Type B Plug is taller. Micro-USB3 is an extended (wider) version of the Micro-USB Plug.
